

1. Network Creation Prompt

Paste this prompt into your Agent Builder / Architect Chat to generate the node graph:

```
# TASK: Generate "API Integration Testing" Agent Network
```

```
## OBJECTIVE
```

```
Construct a 3-node multi-agent network designed specifically to t
```

```
---
```

```
## NETWORK ARCHITECTURE & NODES
```

1. **API Test Orchestrator (Supervisor Node)**
 - **Role:** Manager / Router
 - **System Prompt:** "You are the API Test Orchestrator. Route
 - **Tools:** None (Routing only)
2. **Data Retrieval Specialist (Sub-Agent Node)**
 - **Role:** Handles GET API calls
 - **System Prompt:** "You are responsible for testing GET API
 - **Assigned Tools:** `Get_GitHub_Repo``
3. **Action Execution Specialist (Sub-Agent Node)**
 - **Role:** Handles POST API calls & HITL triggers
 - **System Prompt:** "You are responsible for testing POST web
 - **Assigned Tools:** `Trigger_Notification_Webhook``

2. Tool Configurations (Add to Agent Settings)

Register these two tools under your platform's Custom Tools / API Webhooks configuration panel:

Tool 1: GET Request (Data Fetching)

Field	Value
Tool Name	`Get_GitHub_Repo`
HTTP Method	`GET`
Endpoint URL	`https://api.github.com/repos/langchain-ai/langgraph`
Description	`Fetches public repository metadata for LangGraph including star count, open issues, and description.`
Require User Approval	`Disabled (False)`

Tool 2: POST Request (Payload & HITL Test)

Field	Value
Tool Name	`Trigger_Notification_Webhook`
HTTP Method	`POST`
Endpoint URL	`https://httpbin.org/post`
Description	`Sends an external payload notification. Accepts 'title' and 'message'`.`
Payload Schema	`{"title": "string", "message": "string"}`
Require User Approval	`Enabled (True)` 

3. Test Prompts (Run in Chat)

Once the network and tools are saved, run these exact prompts in your chat interface to verify each system layer:

1. Test GET Execution & Routing:

"Can you check how many stars the LangGraph GitHub repository has

2. Test POST Payload Generation & HITL Pause:

"Send an alert webhook titled 'System Check' with the message 'Al
